Slow learner and advanced learner initiatives in education are designed to address the diverse needs of students with varying learning paces and capabilities.

The college has a well-established counseling system in place. Students are assigned to, identified faculty who act as their counselors. They conduct regular meetings with their student mentees to monitor their academic progress. A student scoring less than 40% marks in 3 or more subjects in internals and having less than 75% attendance is considered as an academically slow learner and vice versa. Counselors keep a close eye on these students and keep their parents informed about their performance

Below are Identification criteria of slow learners and advance learners and action taken.

Slow learner initiatives focus on:

1. Remedial Sessions
2. Soft skill Training

Fast learner Initiatives focus on:

1. Students of the Week
2. Advance case study
3. Role play
4. Poster Presentation
5. Online Certifications.

The figure below demonstrates that the class teacher continuously keeps track of the academic performance of the students and identifies those who have poor academic performance or are slow learners.

In case of Advance learners, faculty encourages and motivates them to perform better in academics as well as provides them different platforms for their professional development.

REPORT ON CASE STUDY DISCUSSION DETAILS

ZIMCA-3-F-4-43

Sr. No.	Contents
1	Case study Title: Corporate Merger Between Volkswagen and Porsche
2	Date of discussion: 29/07/2022
3	Class Name: ZIMCA A
4	Discussion Points: The Underlying Reasons Why Porsche Attempted to Takeover Volkswagen
5	Learning Notes from Case study /Research Paper: <ol style="list-style-type: none">1. The benefits of the merger are that VW's operating profit is expected to increase by 700 million euros a year, Porsche engineering may boost the appeal of VW's more expensive models, and the "platform" system of cutting costs by using standard parts for multiple car models will be expanded as Porsche lines are integrated into VW's stable.2. Another benefit, which may not be a benefit so much as a bragging right, is that an expansion of VW brings it that much closer to becoming the world's biggest carmaker.3. Finally, and although not directly tied to the merger an issue that gained additional attention from it, is the EU-ordered repeal of the VW Law.4. Porsche's former boss, Wiedeking, was looking forward to changing VW's culture from a socialized, semi-protected concern to a capital-efficient machine-like Porsche, and if VW does indeed become more competitive in the global market as a result of the merger or the repeal of the law they could see an increase in profits.

REPORT ON CASE STUDY DISCUSSION DETAILS

ZIMCA-3-F-4-43

Sr. No.	Contents
1	Case study Title: Coca-Cola collaborates with App Annie.
2	Date of discussion: 30/08/2022
3	Class Name: ZIMCA A
4	Discussion Points: Significant challenges faced by the brand and how it overcomes them with remarkable success
5	Learning Notes from Case study: App Annie's data is a linchpin of the deep learning that propels Coca-Cola and its customers forward. "We can manifest that understanding into getting our customers to add new features that engage consumers, into driving engagement in user bases in apps, and even in things like getting the perfect mobile ordering experience in food service," says Chambers. Data from various sources can be used in concert, so Coca-Cola and its customers can drive great experiences for consumers and drive bottom line growth throughout the company's distribution network. Chambers believes that data and insights from App Annie is key to maintaining The Coca-Cola's Company's tradition of best-in-class marketing that has delighted consumers for generations.
