**Performance Appraisal**

**Introduction**

*"Evaluate what you want – because what gets measured gets produced" – James A. Belasco*

Zeal Performance Appraisal System is a blend of Key Result Area (KRA), Key Performance Indicator (KPI) based that known as management by objective and 360degree feedback. Performance appraisal method. Zeal performance appraisal System is more development-focused than appraisal alone and supports competency enhancement of the staff in a better way.

Zeal Institute of Management and Computer Application (ZIMCA) constantly aligning employees' personal goal with that of the organization to enhance productivity. So to achieve goal and objective, employees are provided with open clan culture which enhances transparency and builds a sense of trust and confidence among the employees about the organisation, therefore, a 360-degree appraisal system is deployed. The major reason for selecting the 360-degree appraisal process, because it describes a human resource methodology that is frequently used for both employee appraisal and employee development.

At the beginning of each performance cycle, the employee and reviewer will review the Key Results Area (from the roles and responsibilities). The reviewer and employee document specific responsibilities, with outcomes that describe how successful performance will be measured. Employee and reviewer then assign a priority to each activity. Besides, employee and reviewer should discuss the Performance Factors and agree on how they apply to the employee's work. Ongoing communication regarding performance is expected, both in informal and formal settings throughout the year. Either the reviewer or employee should feel free to initiate discussion of performance progress,

expectations, priorities or obstacles. Meanwhile, feedback about the employee comes from all the sources that come into contact with the employee on his/her job or people with whom he/she interacts on daily basis especially, subordinates team members, students etc. The 360-degree appraisal has four components that include self-appraisal, superior's appraisal, subordinate's appraisal student's appraisal (Students Feedback) and management appraisal.

At the end of each performance cycle, a formal review of achievements concerning the performance standards is documented. This includes a summary of employee performance during the performance cycle concerning individual responsibilities and outcomes for complete one academic year.

**The Component of Performance Appraisal are as follows:**

- **Key Result Area( KRA) With Key Performance Indicator(KPI):** The key job responsibility of every individual is monitored periodically and @ the end of the academic year on various aspects like Student Results, Academic and Administrative capabilities, Research Publications, Projects, Research Guidance, Training courses & Conference/Seminars/Workshops attended and Papers presented, Industrial Relationship etc. Any additional responsibility that the employee undertakes over and above his/her key result area considered with due weightage.
- **360 Degree Peer feedback:** 360-degree feedback is a highly effective development tool especially for coordination and teamwork. Feedback recipients gain insight into how others perceive them and have an opportunity to adjust behaviours and develop skills that will enable them to excel at their jobs.360 feedbacks focus on behaviours and competencies more than on basic skills, job requirements, and performance objectives. This includes the defined behavioural skills which contribute towards achieving the KRAs. Statutory obligations.

**Policy statement:**

To strengthen the aim of achieving the vision and objectives of the organisation, Zeal Institute of Management & Computer Application (ZIMCA) believes that it is only possible with the contribution of a well-

motivated and competent workforce. So, therefore, ZIMCA supports all its employees to get apprehend their potential, to achieve their professional goals and their role relevancy towards achieving the organization's vision. ZIMCA has developed this policy to ascertain the behaviour of an employee anchored to performance and integrate with the organizational performance and on the other side, the policy helps employee of ZIMCA to outline the processes that will help to identify gaps between current and future levels of performance.

- 2) All staff must have an appraisal discussion at least once every 12 months.
- 3) The Institute provides the opportunity for its employees to do his or her self-appraisal at the initial stage.
- 4) The next level of performance evaluation is authorized to the direct reporting, who is the Head of the Institute.
- 5) Along with the superior authority evaluation, the feedback from the peer is also collected based on the defined parameter which establishes the collaborative approach to lead and develop people to improve performance.
- 6) An appraisal is an ongoing process with an annual formal meeting to review progress
- 7) The appraisal discussion is a two-way communication exercise to ensure that both the needs of the individual and the organisation are being met, and will be met in the next year.
- 8) The appraisal discussion will review the previous year's achievement and will set an agreed Personal Development Plan for the coming year for each member of staff.
- 9) Individual staff members are responsible for fulfilling the requirements defined in their staff performance framework (Key Result Area) including teaching and counselling plan, guest lecture, unit tests/examinations/ assignments for progressive assessment report which outlines tasks, objectives and Key performance index
- 10) The appraisal process will provide management with valuable data to assist with succession planning.
- 11) The appraisal process at ZIMCA will be fair enough and equitable process in line with our Equality Policy.

## Process of Performance Appraisal

Defined and Stated Key Result Areas (KRA) with their respective Key Performance Indicator for the Staff clearly and explicitly communicated to all Zeal Staff, before performance cycle begins. Working relationships for each area with departments and with other staff vertically and horizontally across committees will be explicitly defined. The organogram of the institute is also expected to provide the required escalation matrix. It would also be important to set these in a time frame. There should be an overall acceptance of the rating system with each of the KRAs. . It should then be signed by the employee and a copy given to him/her and another filed in respective personal file. The staff should revisit their approved performance plans at least once in a quarter along with the direct reporting authority to ensure that result achievements are progressing satisfactorily.

### **Performance evaluation planning:**

Performance plan for the year for each employee will be prepared in April-June timeframe each year specifying KRA and KPI against which respective results to be achieved. Opportunity to appraisee for self-evaluation is also given due weightage. At the end of the performance cycle, a formal review of achievements with the performance standards is documented. The performance evaluation is evidenced based procedure so respective measuring aspects should be produced and documented in a given format by appraising. Ongoing communication regarding performance is expected, both in informal and formal settings throughout the year. Either the appraiser or appraisee should feel free to initiate discussion of performance progress, expectations, priorities or obstacles. Based on the Evaluation Results, Appraisal/development goals for further improvement /Non-suitability of the employee are discussed.

The Appraisal form is in two sets:- (A) KRA and KPI based performance evaluation form & (B) 360-degree feedback form.

### **Development Goals**

Employee and Appraiser discuss and document development goals to be achieved during the next performance cycle. These may include formal training or education courses, hands-on training, temporary project assignments or mentoring programs. This should include an assessment of how much a priority the development goal is: (C) = Critical; (M) = Moderate; and (VA) = Value Added. Target dates for the achievement of these development goals are outlined, along with an explanation of how they will help the employee's personal or professional development. To identify these goals, employee and supervisor review development needs to be identified in the previous performance cycle. (Annexure C)
